NEWSLETTER APRIL 2017

1. Starting with sports activities in Liceul Tehnologic Bratianu

In April we started with sports activities in Liceul Bratianu. At the beginning of each activity we talked about the theme of our project. Besides we prepared different activities related to sport and healthy life. And the end of the exercises we felt very good because the students integratedvery well in our activities.

2. Making sports activities in Scoala Gimnanziala Tudor Vladimirescu

The next week we went to another school, Tudor Vladimirescu, and the response of the students was also very grateful. That week we changed some of our exercises because we had more experience and also because the students were younger than those of the previous week.

3.   Launching conference and intercultural night

We made our presentation in Dragasani (April 12) and another volunteers visit us and when we finished we started to cook for the intercultural night (Turkey, Jordan, Ukranian, Georgia and Spain).We had meeting with students from Bratianu High School. We cooked our traditional food.

1. Turkey: Menemen, Börek, Kisir and Sekerpare,
2. Georgia:Achma,
3. Ukraine: Sirniki and halva,
4. Spain: Tarta de la abuela,
5. Jordan: Mofarraka and labanwekhyar.

We spent a tıme really good. People were very frıendly and satisfied. We introduce our cultures closer and deeper. We were lucky to finish our act with traditional Turkish music live, our partner played some songs with baglama.

4.   Arrival training

Our arrival training it was in Sinaia, we were 51 volunteers for different countries and we spent one week all together and was amazing, we made a lot of activities and we learned a lot of Romanian culture, and was really useful. We also learned how is to be a volunteer and how is to live in Romania.

Now we have volunteers friends everywhere. In those days we had a meeting with to make some activities and some games to learn more about each, and was really interesting for everyone because like this we take a lot of skills for our near future in this project.
