NEWSLETTER SEPTEMBER 2017

1. Champions

We made an activity for children. They have to find clues marked on their map and complete all the clues.

We gave them Diploma of Participation in Dragaciclism Club since July to September and t-shirt for everyone. It was a nice to share this experience and activity was fun.

2016-2-R001-KA105-024868 PROIECT FINANATAT DE UNIUNEA EUROPEANA

Forum Theatre is a type of theatre created by Augusto Boal. This method is based on the interaction between his actors and his spectators, they called (spect-actors).

After showing a problematic social situation, the spect-actor can provide a solution to the problem presented at the scene.

"Garbage in, Garbage out" is about the trash that we find in the streets and also in natural spaces like near rivers or lakes and in the mountains.

The Oppressor is a nice guy but she doesn't care about environment because she doesn't know what can happen with this trash.

Thanks for the interventions that two students have done because after that we have found other better ways to take care of the environment.

3. Save our planet

We started to make presentations in schools in order to raise awareness about environment, nature, world problems. We made it interactive so students will interest more. We gave them some informations about world statistics, told them about prevention methods of future and present problems.

Erasmus+

Green Life team has begun the workshop of "Save our planet" in Liceul Tehnologic Bratianu and Colegiul National Gib Mihaescu in Dragasani.

We went to three different classes and we gave to them some information about how the planet is changing because our behavior with the environment is not the best one than we can do.

Students have been very involved with the exercises and games that we've prepared about pollution in the air, bad consumer habits and about extinction of some exotic animals that they didn't see yet and they want to see in a future.
